SERVICE CARREAGE CONTRACTOR CONTR

The Army Research Institute-Ft Knox Field Unit has been working toward solution of training and performance problems that result from the Army's acquisition of sophisticated new weapons systems. The research has focused on the development and fielding of the Ml Abrams Tank. Problems in personnel selection and assignment, individual and crew training, and training and performance in units are being investigated by the Weapons System Training Team at Fort Knox.

The M1 "Abrams" Tank requires crewmen to perform a number of long procedural tasks to prepare for and secure after combat operations. The primary document for information on performance of these tasks is the tank operator's technical manual, TM-9-2350-255-10. The TM is to be used in training and as an aid in performing tasks in operational units. In operational testing of the M1 it was observed that many preoperational tasks were not being performed correctly and the TM was frequently not being used. Features of the TM, such as its large size, its being designed for novice performers, and its detailed task descriptions could have contributed causing these problems. Also since there is only one TM per tank it cannot be used by crewmen who must simultaneously power up their stations.

This research product, M1 Procedure Guides, was designed to provide M1 crewmen with a job aid that they could use to perform the procedural tasks necessary to prepare for and secure from combat operations. The Procedure Guides present sufficient information for Armor crewmen who have been previously trained to perform MI tasks. They are grouped by duty station and use a flow chart format to handle decision making and recursive operations. In operational settings the procedures guides are each packaged in plastic binders to protect them from the dirt and grease of the tank work environment. Each page is inserted in a plastic cover to allow for pages to be replaced as changes are made.

Pending the outcome of tests of the effectiveness of the guides, plans are to distribute them when soldiers go through M1, 19K One Station Unit Training and to each M1 battalion as it undergoes transition training. Use of job sids such as the Procedure Guides should impact on the effectiveness and availability of the Ml weapons system.

INTRODUCTION

The Army Research Institute has developed a set of M1 Procedure Guides to meet a perceived need by M1 tank crewmen for detailed procedural task information in a form that would be readily available to them, complete, and usable in the tank work environment. The procedure guides were designed to aid in performance of the noncombat tasks that are required to prepare the M1 tank for combat and power it down after operations. The guides provide each crewmember a convenient, accurate, and comprehensive document which identifies the tasks at his station and the tasks' procedures.

The M1 Procedure Guides were designed to overcome problems that seem to exist with using the tank's operator's manual, TM 9-2350-255-10, as a day to day job aid for performing procedural tasks. The operator's manual is formatted using Skill Performance Aid (SPA) guidelines. Tasks are highly proceduralized. Each task in the manual is described by an extensive verbal description of task steps and a series of illustrations. The task detailing is designed to allow novice performers to complete tasks; this level of detail is probably inappropriate for the needs of experienced M1 crewmen. Also, the use of elaborate task detailing has resulted in a large manual (three inches thick). Although it is divided in three sections, the sections must be kept together because the index for the entire manual is located only in the last section. Because of its size the manual is cumbersome to use. It is difficult to keep open on crewmen's laps.

The most serious problem with using the operator's manual to perform procedural tasks is that there is only one issued per tank. Since each crewman has pre and post operations tasks to perform, at least three soldiers will have to do the tasks without the aid of the manual. Unavailability of adequate task information forces soldiers to rely on their memories to recall task steps. Past research has shown that tasks that are as long and complicated, as are many that

must be performed on the MI tank, cannot be performed accurately for very long after training based solely on soldier's recall. 1, 2

Ml Procedure Guides are designed to serve as job aids for experienced crewmen to use in performance of the Ml's noncombat procedural tasks. Since many of the Ml's tasks are fairly complicated and require crewmen to decide between alternative behaviors, a checklist format which simply lists task steps was not appropriate. For example, the procedure for zeroing the main gun contains 16 potential decision points within more than 100 procedural steps. To overcome this problem, an "algorithmic" type checklist was developed to incorporate those decisions. A set of algorithmic characteristics (guidelines) were established to ensure uniformity in the task descriptions. These characteristics are as follows:

- Algorithms present clear and concise procedures required for successful. task performance.
- Information included in the procedures is restricted to only that which is necessary to perform the task.
- Language used in the procedure steps is unambiguous and at a level appropriate for the users.
- Algorithms make use of symbology when possible. Original symbology new to system operators will be defined prior to presentation in the procedure.
- Notes/cautions/warnings which impact task performance, safety, or system integrity are identified at appropriate places within the procedures.

Goldberg, S.L., Drillings, M., and Dressel, J.D. <u>Mastery Training</u>:

<u>Effects on Skill Retention</u>. US Army Research Institute, Technical Report 513,

<u>Alexandria</u>, VA, March 1981.

²Shields, J.L., Goldberg, S.L., and Dressel, J.D. <u>Retention of Basic</u>
<u>Soldiering Skills</u>. US Army Research Institute, Research Report 1225, Alexandria, VA, Sep 1979.

- All decision points occurring during task performance are identified.

 At these decision points the user is asked a question. Based upon the user's answer (formulated internally) the appropriate succeeding steps will be identified. This branching technique requires that:
 - All decision points occurring in the procedure must be identified.
 - All possible alternative actions/procedures be identified and detailed.
- Each algorithm is presented independently of others -- that is, each will begin on a separate page in the procedure guides.
 - Each algorithm possesses obvious start and finish points.
- Duplication of any "common" subprocedures is to be avoided. For those subprocedures found in a task, a separate algorithm is developed for that subprocedure. This avoids unnecessarily lengthy and repetitive procedures.
 - Necessary pictures or illustrations are included in each procedure guide.
- Each procedure guide contains a table of contents which allows the user to rapidly locate the desired procedure (task).
- The physical dimensions of the procedure guides should be tailored to their intended use and environment. That is, procedure guide size should take into account space required and available for use, storage requirements, and frequency of anticipated or required use.

The algorithms that were produced account for most (if not all) of the unique occurrences within tasks. A procedure guide booklet has been produced for each MI tank crew position. A total of sixty-four tasks are presented across the four guides. Tables 1 through 4 list all tasks included in the Driver, Loader, Gunner, and Tank Commander Procedure Guides. In addition, before, during, and after operations preventive maintenance checks and services (PMCS) activities are

identified in each crew member's guide for the PMCS checks at his station. The tank commander's guide also contains a master list of PMCS checks for each crew station. The tank commander can use this list to supervise and keep track of the conduct of PMCS. The guides are packaged in plastic binders to protect them from the grease and grime of the tank work environment. Each page is inserted in a plastic cover. This has the advantage of protecting the page and allows for easy substitution of pages as changes in procedures are posted.

The M1 Procedure Guides are designed to be supplements to, not replacements for, the M1's operator's manual. Procedures in the guides follow the operator's manual's procedures as closely as possible. If a soldier does encounter a situation not covered by the guide, he should refer back to the operator's manual for complete information on the task. Furthermore, the operator's manual should be used for initial task training. Only after the soldier is familiar with the location of equipment and task terminology should be begin to use the procedure guide to perform a given task.

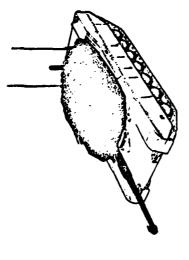

Soldiers will require training on use of the procedures guides. The "algorithmic" style of task formatting and certain abbreviations will be unfamiliar to many soldiers. Learning to use the guides properly and command emphasis on their continued use should result in more careful and accurate performance of pre and post operations tasks.

Many of the training hours on the MI tank or any other tank are spent learning procedures. The unavailability of the TM in most situations and no adequate job aids has required crewmen to memorize most procedures. The use of effective job aids would preclude the need to spend as much training time as is presently spent on procedural tasks. Soldiers would be able to go from task to task after ensuring that they knew the locations of various task referenced equipment and had

gone through the steps using the procedures guide. Effective use of job aids or procedure guides could conceivably free up considerable training time that could then be used to train on skilled performance tasks.

The M1 tank is a complex weapon system that incorporates many technological improvements within its mechanical and fire control systems. Many of the combat functions that depended on human performance accuracy in earlier tanks are performed by the M1's automated systems. The importance of proper operation of these systems is such that the tank's overall capability and firepower can be significantly affected by system failure or improper use. Continued use of job aids such as the procedure guides that follow should contribute to maintaining the M1 tank and ensure its effectiveness on the battlefield.

PROCEDURE GUIDES
HI TANK

JULY 1981

9

PREPARED BY THE U.S. ARMY RESEARCH INSTITUTE FOR THE BEHAVIORAL AND SOCIAL SCIENCES

CENERAL INFORMATION

This booklet contains M tank commander procedure guides. Each guide is for a single pre-operation, post-operation, or during operation activity. Each guide is marched to TM-9-2350-250. (Operator's Manual for Tank, Combat, Full-Tracked, 105

PURPOSE OF PROCEDURE GUIDES

The guides in this booklet will not take the place of the M TM or MI training materials. The guides will aid you in remembering long or difficult sets of procedures. In short, the guides will help to "jog your memory."

USE OF THIS BOOKLET

The Table of Contents (on the next page) lists the procedure guides in this booklet. Each guide gives you a step-by-step outline for completing an activity. The following will help you to better use each guide.

- Some steps within a procedure guide are followed by a page number. On that page you will find a detailed breakdown of the step.
- 2. Some of the procedure guides include a question(s). Each question is stated inside a diamond shape. Your "yea" or "no" to the question will show you which path to follow.
- Some steps within a procedure guide are followed
 by a box. In the box you will find more information on the step or a caution/werning.
- 4. Certain steps within a procedure guide require that a knob or switch be turned to a certain position. In some cases, that position might be written like the symbol to the left. The symbol mans that a light should also come on.
- Master check-off lists of all before, during, and after operations PMCS performed by creumembers are included as an aid in your supervision of these activities.
- Pictures of selected panels/equipment can be found at the end of this booklet.

COMMANDER'S PAREL

GUNNER

PROCEDURE GUIDES

HI TANK

JULY 1981

PREPARED BY THE U.S. ARMY RESEARCH INSTITUTE FOR THE BEHAVIORAL AND SOCIAL SCIENCES

GENERAL INFORMATION

This booklet contains MI gunner procedure guides. Each guide is for a single pre-operation, post-operation, or during operation activity. Each guide is matched to TM-9-2350-255-10 (Operator's Manual for Tank, Combat, Full-Tracked, 105 MM, MI).

PURPOSE OF PROCEDURE GUIDES

The guides in this booklet will not take the place of the MI IM or MI training materials. The guides will aid you in remembering long or difficult sets of procedures. In short, the guides will help to "jog your memory."

USE OF THIS BOOKLET

The Table of Contents (on the next page) lists the procedure guides in this booklet. Each guide gives you a step-by-step outline for completing an activity. The following will help you to better use each guide.

- Some steps within a procedure guide are followed by a page number. On that page you will find a detailed breakdown of the step.
- 2. Some of the procedure guides include a question (s). Each question is stated inside a dismond shape. Your "yes" or "no" to the question vill show you which path to follow.
- 3. Some steps within a procedure guide are followed by a box. In the box you will find more information on the step or a caution/warning.
- 4. Cartain steps within a procedure guide require that a knob or awitch be turned to a cartain position. In some cases, that position might be written like the symbol to the left. The symbol is not not be a light should also come on.
- Pictures of selected panels/equipment can be found at the end of this booklet.

MER OF COMIEN

PREPARE STATION

1.	Gunner Enter station (page 3)
2.	GUN/TURRET DRIVE . MANUAL
	Turret traverse lock Lock
4.	Turret power ON
5.	Seat Adjust
6.	Domelight Adjust
7.	Weapon Install (page 4)
8.	Intercom Adjust
9.	Chestrest Position for firing
10.	Browpade Adjust
11.	Station Power up (page 5)
12.	GPS functional check, Perform (page 7)
13.	GPS adjustments Perform (page 9)
14.	Computer self test Perform (page 18)
15.	Computer data check! Perform (page 10)
16.	TIS checkout Perform (page 13)

17. GAS adjustments. . Perform (page 17)

18. Fire control system Test (page 21)

ENTER STATION

1. Londer's hatch . . Unlock/open

2. GUM/TURRET DRIVE . - HATTAL-

3. Turret traverse lock Lock

5. Gunner Enter station

INSTALL COAXIAL MACHINEGUN

1. Weapon Clear (page 61) 2. GPS FIRE CONTROL MODE - HANDAL-3. Elevation travel lock Unlock 4. Hain gum Elevate manually 5. Smoke box doors. . Open Quick release pins Remove 7. Mussle of barrel . Insert into smoke box 8. Weapon Align receiver holes with mount holes 9. Trigger. Meets operating level roller with no pressure on trigger '10. Quick release pins Insert 11. Smoke box doors. . Close 12. Spent case Assure correct collection box . . mounting

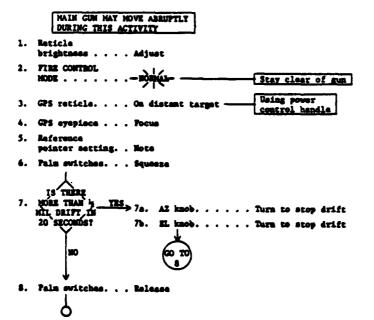

POWER UP STATION

IF LOUD, HIGH-PITCHED SQUEALING NOISE IS HEARD, OR IF HYDRAULIC PRESSURE DROPS SUDDENLY TO BELOW 500 PSI, SHUT OFF TUR-RET POWER AND SHUT DOWN ENGINE 1. Turret power . . . Assure ON 2. Electrical Assure minimum system gags. . . . 15 volts Engine or AUX HYD PWR. . . . Running or OH (TC) All lights on 4. PANEL LIGHTS GPS upper and TEST button. . . . Press lower panels and TIS panel on 5. PANEL LIGHTS . . . Adjust 6. Hydraulic pressure gage. . . 1500-1700 PSI 7. CCP power. -8. CCP TEST button. . Press/check lights 9. CCP cover. Close/latch

PERFORM GPS FUNCTIONAL CHECK

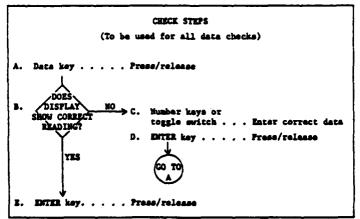

9. GUN SELECT . . . - HAIN -10. AMOND SELECT. . . Check lights for all positions 11. GPS ballistic doors. Open See clear view in 12. FLTR/CLEAR/SHTR. . CLEAR GPS eyepiece Zyepiece shows maglever. 10% to 3% to 10% nification changes See filter present 14. FLTR/CLEAR/SHTR. . FLTR in GPS eyepiace Daylight view 15. FLTR/CLEAR/SETR. . SHTR blocked out of GPS eveniece See clear view in 16. FLTR/CLEAR/SHTR. . CLEAR GPS erestecs Q

PERFORM GPS ADJUSTMENTS

PERFORM COMPUTER DATA CHECK

The box (to the right) contains the common data "CHECK" sequence. When a step in this procedure requires you to "check" a data entry, use this common sequence. Then, go to the next step in the procedure.

- 1. COM SELECT . . . HATH-
- 2. CCP power. . . . - -
- 3. ANNO TERP data . . "Check" (use number keys)
- 4. BABO PRESS data. "Check" (use number | If not known, use 29.92

- 7. BORESIGHT data . . "Check" (use toggle switch)
- 8. 195 lever. . . . OUT
- 9. BORESIGHT data . "Check" (use number keys)
- 10. GUM SELECT . . . COAT-
- 11. AMMO SUEDES data "Check" (use number keys)
- 12. 35 renge data. . "Check" (use number keys)
- 13. ZERO data. . . . "Check" (use number keys)
- 14. GUH SELECT . . . 1440-

15. AMMO SELECT. . . SABOT or HEP OF BE

OF HEAT

ANNO SUBDES data . "Check" (use number keys)

"Check" (use number 35 range data. . . keys)

"Check" (use number keys or toggle switch)

1 HAS SURDES, BS. AND ZERO DATA BEEN CHECKED FOR ALL AND TYPES? YES

"Check" (use number 20. TUBE WEAR date . keys)

21. · Key cover. . . . Close

22. CCP door Close/latch

PERFORM TIS CHECKOUT

1. THERMAL MODE . . . STRY

2. FLTR/CLEAR/SETE. . SETR

3. POLARITY WHITE NOT

TREMAL MAGNIFICATION. . . 3X

5. WIT TEST

PATIEN. PCU

6. Fault light. . . On less them 5 seconds

7. GPS image. . . . See range, possible P

8. UNIT TEST

PATTERN. ICU

9. Fault light. . . . On less them 5

10. GPS image. See test pattern, dark upper right corner, possible ____

11. WHIT TEST

PATTERN. EU

12. Fouls light. . . On less than 5 seconds

13.	THERMAL HODE ON	
14.		l bottom symbols, age 8888, possible
IJ.	THE INAL HAGRIFICATION 101	t
16.	GPS image. , Sec ici	s woving TIS ret- le, range 8888
17.	TRU READY light Ass	Mare of
18.	UNIT TEST PATTERN TRI	J
19.	Fault light On	less them 5
20.	po Le	e reticle centered, rtical ber left of ticle, renge at ttom, possible seible 7
21.	CONTRAST Ad	juet
22.	SENSITIVITY Ad	juez
23.	RETICLE Ad	just brightness
24.	POLARITY BL	ACK NOT
25.		e dørk ber om som beckground

26.	POLARITY	WHITE HOT
27.	GPS image	See light ber on dark background
28.	UNIT TEST PATTERN	OFF
29.	THERMAL ballistic door	Open.
30.	GPS reticle	On 1000 meter target
31.	CONTRAST	Adjust
32.	SENSITIVITY	Adjust
33.	70CUS	Adjust
34.	Computer	Enter 2680 range
35.	SYNGOL knob	Clockwise all the way
36.	GPS image	See range symbol reads 2680, no F
37.	STIMOL knob	Adjust
38.	GPS image,	Range symbol should not interfere with target image
39.	THERMAL MAGNIFICATION	. 3%

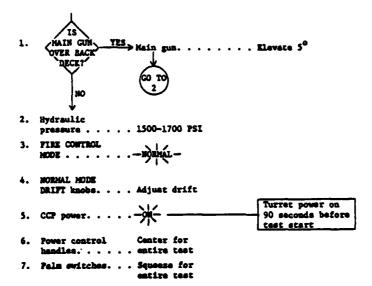

40. THERMAL MODES. . . ON, STBY, or OFF OFF, set FLTR/CLEAR/SHTR to CLEAR

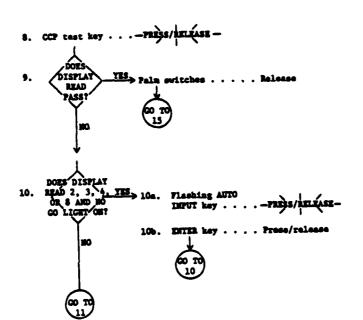

41. THERMAL ballistic door . . Close If TIS not used immediately

PERFORM GAS ADJUSTMENTS

If used during night/reduced visibility 1. Reticle brightnese knob. . . . On --2. GAS reticle. . . . On distant target 3. Reticle brightness . . . Adjust 4. GAS focusing Adjust to focus ring reticle 5. GAS filter knob. . Adjust 6. RETICLE select . . SABOT/HEP 7. GAS image. See MEP-T and APPSDS-T legends above reticle 8. METICLE select . . MEAT 9. GAS image. . . . , See HEAT legend above reticle 10. Reticle brightness knob. . . . OFF if daylight P

PERFORM COMPUTER SELF TEST

DOES DISPLAY

11. READ 1, 5, 6, YES
OR 7 AND NO
CO LIGHT ONT

12. Display. Reads FAIL

13. Palm switches. . . Release

14. Corrective action Take

15. CCP door Close/latch

TEST FIRE CONTROL SYSTEM

Lead system chack. Perform (page 22)
 Firing circuits chack. Perform (page 24)
 Crosswind sensor chack. Perform (page 28)

PERFORM LEAD SYSTEM CHECK

1. Computer self test Perform (page 18) 2. GPS day ballistic door . . Open 3. FIRE CONTROL 4. GUN SELECT . . . - HAIH-5. AMEG SELECT. . . . -HEAT-6. HAGNIFICATION. . . 10X 7. FLTR/CLEAR/SHTR. . CLEAR Power control handles. Center 9. Palm switches. . . Squeeze/hold 10. Computer Enter 2000 meter range 11. GPS image. . . . Observe Power control Slowly move left/ mendies. right/center 12. Power control

PERFORM FIRING CIRCUITS CHECK

BE SURE ALL WEAPONS ARE CLEAR

- 1. GUN/TURRET DRIVE . MANUAL (loader)
- 2. Main gun tube/
 - turret/breech. . . Clear
- 3. Breech block . . . Close (loader)
- 4. Tester Between gun tube and breech block
- 5. Ejection guard . . Rear (loader) -ARMED light on
- 6. Turret networks box circuit
 - breakers CB19,
 - CB20, CB29 . . . ON (loader)
- 7. GIN SELECT . . . -HAIN-
- 8. Blasting Machine . Operate -Tester should flash
- 9. Manual elevation crank handle
 - palm switch. . . . Squeeze

- 10. Manual elevation Tester should flash crank handle trigger. Press repeatedly each time trigger is pressed
- 11. Gun tube/ turret/breech. . . Clear

GUN AND/OR TURRET MAY HOVE ABRUPTLY DURING FOLLOWING STEPS

- 12. CUM/TURRET DRIVE . POWERED- (loader)
- 13. FIRE CONTROL
- 14. Palm switches. . . Squeeze
- 15. Left trigger . . . Squeeze/release -Tester should flash
- 16. Right trigger. . . Squeeze/release -Tester should flash
- 17. Palm switches. . . Release
- 18. Turret traverse lock Lock (loader)
- 19. Both palm switches Squeeze
- 20. Power control
- handles. Rotate left
- Tester should 21. Left trigger . . . Squeeze/release not flash

22.	Right trigger Squeeze/release	Tester should not flash
23.	Power control handles Rotate right	
24.	Left trigger Squeeze/release	Tester should not flash
25.	Right trigger Squeeze/release	Tester should not flash
26.	Both pelm switches Release	
27.	Turret traverse lock Unlock (loader)	
28.	Elevation travel lock Lock	
29.	Power control Pull back trying to handles elevate weapons	
30.	Both palm switches Squeeze	
31.	Left trigger Squeeze/release	Tester should not flash
32.	Right trigger Squeeze/release	Tester should not flash
33.	Both palm switches Beloase	
34.	Elevation travel lock Unlock	
	\ 1 /	
35.	COM SELECT TRICCER SAFE -	
	GUN SELECTTRICCER SAFE Both palm switches Squeeze	
36.	Soth palm	Tester should not flash
36. 37.	Both palm switches Squeeze	
36. 37. 38.	Both palm switches Squeeze	not flash Tester should
36. 37. 38. 39.	Both palm switches Squeeze Squeeze Squeeze/release	not flash Tester should

PROCEDURE GUIDES

HI TANK

JULY 1981

PREPARED BY THE U.S. ARMY RESEARCH INSTITUTE BEHAVIORAL AND SOCIAL SCIENCES FOR THE

GENERAL INFORMATION

This booklet contains MI driver procedure guides. Each guide is for a single pre-operation, post-operation, or during operation activity. Each guide is matched to TM-9-2350-255-10 (Operator's Menual for Tank, Combat, Full-Tracked, 105 MM, MI).

PURPOSE OF PROCEDURE GUIDES

The guides in this booklet will not take the place of the MI TM or MI training materials. The guides will aid you in romembering long or difficult sets of procedures. In short, the guides will help to "jog your memory."

USE OF THIS BOOKLET

The Table of Contents (on the next page) lists the procedure guides in this booklet. Each guide gives you a step-by-step outline for completing an activity. The following will help yow to better use each guide.

Some steps within a procedure guide are followed by a page number. On that page you will find a detailed breakdown of the step.

-:

- Some of the procedure guides include a ques-~
- Some steps within a procedure guide are followed by a box. In the box you will find more informa-tion on the step or a caution/warning. tion(s). Each question is stated inside a diamend shape. Your "yes" or "no" to the question will show you which path to follow.
 - 4 1/
- sition. In some cases, that position might be written like the symbol to the left. The symbol that a knob or switch be turned to a certain po-Certain steps within a procedure guide require means that a light should also come on.
- Pictures of selected panels/equipment can be found at the end of this booklet. š

PROCEDURE GUIDES

HI TANK

JULY 1981

PREPARED BY THE U.S. ARMY RESEARCH INSTITUTE FOR THE BEHAVIORAL AND SOCIAL SCIENCES

CENERAL INFORMATION

This booklet contains MI loader procedure guides. Each guide is for a single pre-operation, post-operation, or during, operation activity. Each guide is matched to IM-9-2350-255-10 (Operator's Manuel for Tenk, Gombet, Full-Tracked, 105 MM, MI).

PURPOSE OF PROCEDURE GUIDES

The guides in this booklet will not take the place of the HI IM or HI training materials. The guides will all you in remembering long or difficult sets of procedures. In short, the guides will help to "jog your memory."

USE OF THIS BOOKLET

The Table of Contents (on the next page) lists the procedure guides in this booklat. Each guide gives you a step-by-step outline for completing an activity. The following will help you to better use each guide.

- Some steps within a procedure guide are followed by a page number. On that page you will find a detailed breakdown of the step.
- 2. Some of the procedure guides include a question (s). Each question is stated inside a dismond shape. Your "yes" or "no" to the question will show you which path to follow.
- Some steps within a procedure guide are followed
 by a box. In the box you will find nire information on the step or a caution/warning.
 - A Certain that a bit on.
- 4. Certain steps within a procedure guide require that a knob or switch be turned to a certain position. In some cases, that position might be written like the symbol to the left. The symbol means that a light should also come on.

 5. Pictures of selected panels/equipment can be found at the end of this booklet.
